

Whether your laboratory is expanding, becoming more competitive, or looking to provide clients with additional functionality, **CGM LABNEXUS[®]** can be optimized to meet your specific needs.

SCANNING

Allows users to scan documents during patient registration. Maintain an electronic record for every patient: store insurance cards, identification, and other important documentation. Upload images directly from the scanner or by attaching existing files.

ELECTRONIC SIGNATURE

Captures patient signatures for drug and toxicology testing using this simple, paperless system. Store the required signatures for each lab order.

PATIENT PORTAL

Grants patients electronic access to his or her own lab results and history. Patients can view the same detailed reports that a doctor would see.

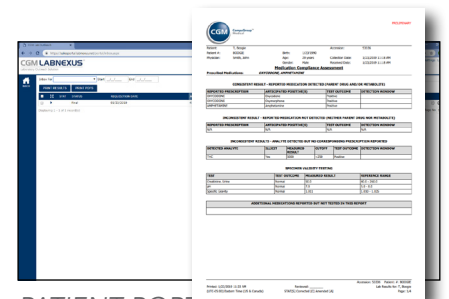

SALES PORTAL

Provides a laboratory's salesperson access to his or her clients' order and panel volumes, trends, and insurance mix. A user-friendly management dashboard displays the entire team's stats and order volumes. By implementing an additional export interface, **CGM LABDAQ** can send order information to **CGM LABNEXUS** to provide a complete overview for each salesperson.
