

Simplify your workflow. **CGM APRIMA** uses our specialty template library and Adaptive Learning to follow the flow of a patient visit.

Fast documentation and ordering

- Document procedures and follow-ups in less than a minute, entering data via ambient AI, voice recognition, dictation, touch screen, point-and-click, keyboard, or handwriting recognition
- Choose your most frequent diagnoses, prescriptions, and follow-up procedures at a glance

Built around how your practice runs

- Reserve rooms, equipment, and providers with built-in profiles and time allocations, and schedule multiple same-day appointments (e.g. X-ray followed by provider)
- Create a specific orthopaedic specialty care team for sub-specialty needs such as hand, hip, back, or knee, and track what your team does

"I really like the specialty vocabulary that CGM APRIMA worked hard to develop. I see different programs every year, and the orthopaedic vocabulary in CGM APRIMA's system is head and shoulders above other programs."

DR. PAUL SCHWARTZ

SHASTA ORTHOPAEDICS[†]

[†]Client received compensation as a referral and agreed to be featured in an advertisement.

Automatic messages to referring physicians and patients

- Create and transmit HIPAA-compliant notes back to the referring physician
- Tailor notes based on your preferences and recipient roles without stopping to edit each one
- Create patient-oriented visit summaries with non-medical terminology

Speed and efficiency at the point of care

- Follow the flow of your exam—chart quickly by chief complaint, procedure, problem, or previous visit, with past notes carried forward automatically, or use our ambient AI option that listens to encounters and creates structured notes, diagnoses, and orders
- Learn your treatment plans for common complaints with Adaptive Learning, so you can order tests, document procedures, and write prescriptions faster over time
- Communicate with referring physicians and other specialists about patients in your care through powerful interoperability

More efficient e-prescribing

- Transmit prescriptions securely, with electronic refill requests, automatic medical history retrieval, and reconciliation and eligibility information
- View co-pay costs instantly and determine if a generic or equivalent medication exists
- Support speed, safety, and time-to-therapy with built-in EPCS, PDMP, and electronic prior authorization

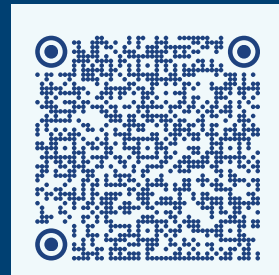

Supporting the patient journey

With options for your EHR and complementary software and services by CompuGroup Medical, you can support orthopaedic patients well beyond the procedure itself.

- Offer a telehealth post-op check-in with **Patient Connect** when an in-person visit isn't needed
- Hand off complex surgical coding—modifiers, bilateral procedures, multiple-procedure rules—to the optional **ARIA RCM Services** team
- Ease the cost of procedures for patients with the optional **CGM PAY**, including card-on-file and payment plans
