

eMEDIX SCRUBBING

CGM eMDs

EHR and Practice Management

Save time, improve cash flow, and avoid lost revenue with our advanced, fully integrated scrubbing and compliance denial prevention solution.

Included payer rules & customizable edits

CGM eMDs is a powerful practice management solution, and you can take advantage of an extra layer of edits when you use the tightly integrated **eMEDIX** EDI system and clearinghouse.

With **eMEDIX**, your claims are compared to EDI formatting standards and thousands of payer edits and rules that are updated in real-time, further optimizing your clean claims rate. Access the comprehensive edits available from within **CGM eMDs**.

You can even contract with us to tailor the workflow steps and edits for your specific practice.

Coding compliance & premium scrubbing

Coding compliance and validation review is included with your **eMEDIX** integration, or upgrade to the premium service to customize the rules you want by payer and by type. The return on investment is clear; just one paid claim makes your investment worthwhile.

**Powered by Alpha II*

Available Edits & Scrubbing Options

Medical**

Red alerts highlight problems and include detailed edit information. Quickly send tasks from within the workflow.

The main posting screen shows which claims have passed edits and scrubs. Quickly sort the list and make corrections.

- Real-time prompts appear alongside codes in **CGM eMDs** so you can fix errors immediately and prevent time-wasting and expensive claim denials
- Cleaner claims sent to payers on the first attempt
- Reduction in your number of claim denials
- Improved cash flow thanks to improved first-pass yield
- Prevention of underpayments before claims are submitted
- Corrected coding in accordance with up-to-date data and compliance guidelines
- Roll-up reporting to help identify common coding errors in your practice. Refine your workflows, EHR templates, and other processes to improve your coding and efficiency.

View scrubbing and edit status in the eClaims window.
