## Streamlined Billing. Profitability.

Save time and money while you concentrate on your core mission — delivering high quality healthcare.

## Customized Processes. Customized Results.

Work smarter, not longer by customizing and automating your routine processes.

## Secure Data. Accountability.

Put measures in place that help you uphold the trust of your patients and the reporting agencies that you are accountable to.

## Testimonials

*"We recently broke our own record by achieving 19 days in Accounts Receivable (AR) for our claims. About 10 years ago, our AR days were far above 60. With the help of CGM webPRACTICE™, we have succeeded in progressively surpassing the industry average of about 30 days in AR. The insurance collections module in the solution has made such a huge difference to us. We are able to set follow-up dates for Medicare and our other insurance plans. If any claim remains unpaid longer than it should, we have the ability to flag it for immediate follow-up to ensure timely reimbursement."*

- Teri Paluso , Practice Administrator  
**Interventional Pain Consultants, PA**

*"CGM webPRACTICE™ has enabled Arizona Orthopedic Associates to increase operational efficiency. As a result, our practice has only two billers on staff even with considerable growth in our operations over the years. We are able to realize annual cost savings associated with staffing to the tune of about \$75,000."*

- Bob Cordova Practice Administrator  
**Arizona Orthopedic Associates**

*"I've had opportunities to view demos of other practice management solutions since I joined [Cardiovascular Consultants, LTD] CVC in 2001 and have found no other solution that comes close."*

- Linda Ellis. Director of Billing  
**Cardiovascular Consultants, LTD.**
