

DON'T JUST TAKE OUR WORD FOR IT

Hear from your peers and fellow eMDs users how Abyde has simplified HIPAA compliance challenges and made their practice's compliance program a breeze.

WHY HIPAA MATTERS:

67%

of Healthcare leaders think their organization will experience a cybersecurity attack this year.

*2018 Ponemon & Opus Survey

"We are very happy with Abyde, the software takes the challenge out of meeting Compliance and Risk Management issues. **The HIPAA training has made my staff more conscious of the rules and was easy to administer and track.** The software continually sends notifications to update information so we can stay current with all compliance issues. **Above all, you will not find a more economical choice** that provides all of the resources needed for compliance in your medical practice."

Amy, Office Manager
Orthopaedics & Rheumatology

"We found Abyde on the vendor display floor at Aprima's User conference...we were not in the market for a HIPAA compliance system at the time but as more and more information continued to come out about cyber fraud we began to investigate vendors who could both help with implementing a system and maintaining controls thereafter. We found Abyde to be the best choice for us and have not been disappointed. **The step by step implementation process got us up and running quickly, and the ongoing monitoring of our status keeps us in control.** The best part is I don't have to spend a lot of time worrying about our controls."

Paul, Clinical Administrator
Asthma & Allergy

"I'm happy my practice decided to use Abyde as **it has made compliance and meeting requirements much easier. I love that I am notified of updates and when training is required.** I know that we are meeting all regulations with this product."

Linda, Practice Manager
Nephrology
