

# PROVEN SOLUTION

**CGM eMDs**

EHR and Practice Management

**CGM eMDs** is designed by practicing physicians who recognize that software needs to be fast, customizable, and intuitive at the point of care. Since 1996, **CGM eMDs** has built solutions based on how physicians work and engage with their patients. Physician satisfaction is always top of mind, and our customers play an important role in product design and strategy.

## Timely & Accurate Reimbursements

A comprehensive set of billing and accounts receivable management features combined with administrative task and workflow management tools.

## Smooth Throughput Drives Patient Satisfaction

Scheduling patients, equipment and staff can be a complex task – and one that makes a huge difference in patient satisfaction. This intuitive and easy to use part of Solution Series drives productivity and a smoothly run office.

## Document Rapidly & Accurately

Swift and complete documentation at the point of care results not only in better outcomes and care coordination, but more accurate charge capture and faster payments. Templates for specialties allow for faster implementation of specific documentation requirements based on practice type.

## Drive Patient Engagement & Satisfaction

Our patient portal is an easy way for patients to communicate with your office. Our portal offers the capability to deliver patient health record data, appointment requests and confirmations, results messaging, health maintenance reminders, refill requests and more. Online, secure and convenient. Plus, the portal can reduce resource requirements for your staff.

“They’re like my own employees. We’ve had them remote in at all hours of the day, even on weekends, to help us. Their support is just over the top.”

## Clinical Modules

Our award winning EHR package is designed to expedite the documentation of care, as well as track and complete the administrative and clinical tasks necessary to provide complete medical care. **CGM eMDs** Chart allows swift and complete documentation at the point of care in a manner that is intuitive and easy to use. This translates into better outcomes and higher patient satisfaction.

An efficient electronic document management system, **CGM eMDs** DocMan allows for the rapid scanning of paper documents, the importing of electronic files or images of any type, and serves as a central repository of all patient information coming from the outside world.

**CGM eMDs** Patient Portal is a powerful tool for practices to engage with patients. Patient health record data, appointment requests and confirmations, results messaging, health maintenance reminders, refill requests, global messaging capabilities, and more keep patients connected and engaged with your practice and more compliant with their care plans and wellness. At the same time, practices can take advantage of the faster, more efficient, and lower cost benefits of the tight integration with existing Solution Series.

## Practice Management Modules

A powerful practice management application includes a comprehensive set of billing and accounts receivable management features combined with administrative task and workflow management tools. Through the automation of common billing office functions, **CGM eMDs** Bill streamlines front and back office workflow while ensuring timely and accurate reimbursement.

**CGM eMDs** Schedule maximizes office productivity by making physician and equipment scheduling quick and easy. Schedule ensures that the complex rules associated with scheduling medical care are upheld. For your front office staff, it provides the intuitive and easy to use tools they need to drive practice productivity while creating an environment that ensures the highest level of patient satisfaction.

A robust intra-office messaging and tasking system make it easy for you and your team to stay on track and easily deal with all the communications that fly around a medical practice. Truly the glue of the system **CGM eMDs** TaskMan makes it possible to go home on time. Integrated tightly into your workflows, results system, prescribing, reports, and even automated practice management tasks, TaskMan helps you run an efficient practice so you can focus on patient care.
