

# CGM REMOTE PATIENT MONITORING

## Earn up to \$700 per patient/per year.

**CGM Remote Patient Monitoring** is an easy-to-use software platform that connects patients with physicians by capturing remotely measured vital signs in real-time. Patients can track their health more easily than ever before with their fully integrated **CGM Remote Patient Monitoring** device. Physicians can take advantage of this revenue opportunity while simultaneously improving the outcomes for patients who require high quality remote care.

### Remote Patient Monitoring Additional Details

- No upfront expenses for providers nor patients who qualify\*
- Patient health devices are connected
- Platform is cloud-based

\*Some patients may be subject to a copay

### Save Time. Save Lives.

**CGM Remote Patient Monitoring** saves you time and money by collecting your patients' health monitoring device data for ease of access and immediate review.

### Data Security. Accountability.

The **CGM Remote Patient Monitoring** platform is cloud-based and safely managed within CGM's ultra secure server architecture.

### Customized Set-Ups. Customized Results.

The **CGM Remote Patient Monitoring** platform is compatible with an assortment of health devices. CGM will provide your patients with a **CGM Pulse Oximeter** so that you can continue to stay up-to-date on their vitals while maintaining social distance.

### CGM Remote Patient Monitoring & COVID-19

With remote patient monitoring, staff can continue to monitor a patient's blood oxygen level which is a key metric of an onsetting or worsening of the COVID-19 condition. Improve the care offered to patients outside the hospital with the **CGM Pulse Oximeter**. Ensure the health of your patients, yourself, and your team with **CGM Remote Patient Monitoring**.
