

BENEFITS INCLUDE:

- Financial analysis and strategy formulation to increase revenue
- Clinical analysis focused on driving better outcomes and value-based care delivery
- Identify core competencies and investing in those for sustainable growth
- Use information to identify operational gaps and support operational improvement initiatives
- Track key parameters for regulatory measures, identify gaps and take corrective actions to increase compliance

INTERACT WITH YOUR DATA IN A WHOLE NEW WAY...

CGM ANALYTICS™ is an advanced healthcare business intelligence solution that aggregates data from disparate systems into a user-friendly platform, providing users with access to interact with and analyze consolidated data, gain better insight into business trends and make informed decisions. Get the complete picture of the health of the organization and quickly identifies problem and opportunity areas. It also facilitates a deep-dive into data for effective root cause identification of critical issues and gap analysis.

A comprehensive range of features include:

- Full compatibility with Electronic Health Records, Health Information Systems and Practice Management Systems
- Intuitive, interactive and user-friendly dashboards that can be customized
- A library of business and specialty-specific dashboards
- Power User feature that enables users to create their own custom dashboards
- Comprehensive reporting functionality that includes ad-hoc and pre-configured reporting templates, supporting compliance to regulatory requirements
- Centralized CGM data repository for data management, standardization and consolidation
- Streamlined deployment and minimal, efficient implementation timelines
