

The era of tailor-made healthcare is here.

PRECISION MEDICINE

According to the National Institutes of Health (NIH), precision medicine is an emerging approach for disease treatment and prevention that takes into account individual variability in genes, environment, and lifestyle for each person.

The Precision Medicine Initiative was launched to pioneer a new model of patient-powered research. The Initiative promises to accelerate biomedical discoveries and provide clinicians with new tools, knowledge, and therapies to select which treatments will work best for which patients.

The emergence of precision medicine brings to light the benefits of adopting innovative clinical decision support tools to gain a better understanding of underlying factors that may impact a patient's health.

CGM GENOMICS™ Powered by ActX® is seamlessly integrated into your electronic health record solution and provides affordable DNA testing to help providers better predict the efficacy of prescribed medications and other treatment options for patients.

WHY CGM GENOMICS?

- **Anticipate drug-genome interactions.** At the time a prescription is written, providers can receive immediate alerts on medication efficacy issues or adverse reactions based on a specific patient's genetics.
- **Identify actionable genetic risks.** With a complete view of a patient's genomic profile, providers can identify potentially serious risks in order to make recommendations for their effective management.
- **Stay on top of patient care with regular updates.** Patient data is frequently reanalyzed as new evidence becomes available. You'll be notified if any new findings are identified. Get relevant information based on your patient's genomics, right from your EHR solution.

HOW CAN CGM GENOMICS HELP?

- Knowing a patient's genomic profile can provide insight into possible side effects of a particular medication, dosage needs or even alternative medication options. **CGM GENOMICS** makes this possible.
- Having the tools to identify patients with a genetic predisposition for specific conditions facilitates early screening.

FAQs

IS THIS RIGHT FOR MY PRACTICE?

CGM GENOMICS is designed to work within your existing clinical workflow. Access to patient genomic information in the clinical context facilitates easy decision-making. Enhance the care you provide with next-generation decision support tools.

IS THIS RIGHT FOR MY PATIENT?

Today's patients have access to more information and technology than ever before. **CGM GENOMICS** enables you to partner with your patients as you deliver care. You can support your patients by anticipating potential adverse reactions to treatment.

HOW RELIABLE IS THE INFORMATION?

Behind **CGM GENOMICS** is a team of world-class scientists, university advisors and EHR specialists who deliver evidence-based information that you can trust. Our secure and HIPAA compliant technology is data encrypted.

GETTING STARTED

1. Register with CompuGroup Medical US to receive real-time genomics services via **CGM GENOMICS**.
2. Get authorization from your patient to receive an easy-to-use in-home saliva collection kit.
3. Get access to your patient's genomics results.
