

UPGRADE TO CGM LABDAQ

CGM LABDAQ

Laboratory Information System

CGM LABDAQ features streamlined workflows for quality control, orders, turnaround time monitoring, and more. See just a few of the comparisons to LabDAQ 4 below.

While CompuGroup Medical has yet to set a sunset date for LabDAQ 4, we are encouraging our lab partners to upgrade now to our newest platform: **CGM LABDAQ** with MS-SQL Server.

CGM provides basic support for LabDAQ 4 including technical support for general questions and critical bugs. We continue to develop new custom reports and implement analyzer interfaces from our existing library. Support is no longer available for custom product development and non-critical bugs.

	CGM LABDAQ v. 23.3	LabDAQ 4
System		
Architecture	.NET	Delphi
Server Database	MS-SQL	Oracle
Simplified Licensing for Virtual Environments	✓	-
