Once downloaded, you can now run the file.

If you need to run 1 weekly file for the latest prices, you can click on '**Install**' and the file should run and complete successfully.

However, if you are a few weekly files out, you can click on '**Install**'. A pop-up will let you know there is a dependency found on a file not installed. Click 'Yes' if you want to install and all previous files will run and install before installing the latest file.
