Transform data into actionable insight
Gain actionable clinical insight by leveraging a solution that integrates large volumes of patient data from a variety of sources.

Discover a revolutionary approach to disease management
Transform the care your healthcare organization delivers to individuals with chronic illness.

Improve care, reduce costs and save lives
Develop effective provider and patient incentive programs and track their impact using quality metrics that promote consistency across a network of providers.

CGM SAM’s advantages for organizations, providers and patients

Organizations
- Gain precision in targeting at-risk members and those already diagnosed with chronic disease
- Promote the implementation of customizable clinical benchmarks across providers to improve population health
- Leverage rules-based, targeted treatment goals for each patient and successfully monitor their progress

Providers
- Enhance the ability to identify high-risk patients
- Improve patient safety and compliance monitoring beyond office visits
- Effectively capture quality metrics as part of a pay-for-performance initiative or other value-based care model

Patients
- Realize new levels of empowerment and proactivity in determining health outcomes
- Experience a new dimension to the provider-patient relationship
- Reduce the incidence of hospitalization
