

CODING MADE ACCURATE & EASY

Coding Validation

Accuracy is key for reimbursement and audit protection. We review your documentation to validate coding accuracy. We review each superbill, invoice, and claim, as well as E&M visits, surgeries, procedures, tests, modifiers, and your ICD-10 usage. We recommend updated procedures, deliver findings reports, and address discrepancies.

Abstract Coding

Our full-service option. We do your coding for you, working directly from documentation you provide. We enter your charges, ensure coding is properly documented in patient notes, review patient charts when rejections require corrections, and provide those coding corrections as needed.

Coding Audit

Available as a one-time project or part of an ongoing review, our coding audit takes a look at your E&M services to ensure the level billed is fully supported by documentation. We identify overcoding, undercoding, and compliance risks. We uncover any missed procedures, provide the correct CPT® codes, and offer one-on-one provider training to improve coding and documentation.

Simplifying complexity

Why is medical coding so complicated?

For something so critical to continuity of care and the financial reimbursements owed to a practice, it's important to have the experts on your side.

Contract with ARIA Coding Services and stay up-to-date with:

- Coding guidelines that evolve quarterly or annually
- New codes to capture services you provide
- Areas for improvement in your documentation
- Managing coding rejections and denials

From auditing and advice to full coding services, our team makes the complicated coding process much easier for you and your practice.

Levels of service

Choose the level of service that you need.

Validation or abstract coding is available as an add-on to your full RCM agreement or as part of your workforce augmentation contract.

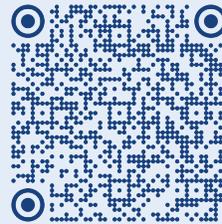

Responsibility	Coding Validation		Abstract Coding	
	Practice	ARIA	Practice	ARIA
Enters charges in practice management system (CPT, ICD-10, modifiers)	✓	-	-	✓
Ensures coding is properly documented in charts/notes	-	✓	-	✓
Reviews charts/notes when coding rejections/denials require corrections	-	✓	-	✓
Provides corrections to coding rejections/denials	-	✓	-	✓
Monthly coding denials/rejections review, staff training	-	✓	-	✓

Drive down denials and rejections with oversight and recommendations by the expert ARIA Coding Services team.

Need more?

Our experts can do your coding for you. Select the level of service that would help you best.
