

REAL-TIME UTI DETECTION

BacterioScan 216Dx Bacterial UTI Detection

Results in
**Three Hours
or Less**

[Click here](#) to see the introductory video for the BacterioScan 216Dx.

OVERVIEW

The **BacterioScan 216Dx** delivers real-time urine screening for bacterial growth.

With negative results in three hours and positive results in less time than that, the **BacterioScan 216Dx** takes days off the typical UTI screening.

BENEFITS

- Facilitates faster rule-out of negative UTI samples
- Promotes antibiotic stewardship by preventing unnecessary antibiotics or enabling faster de-escalation
- FDA-approved UTI detection provides more reliable results than other common screening methods
- Saves labs money compared to many alternatives, such as send-outs
- Integrates seamlessly with your CompuGroup Medical laboratory information system

BETTER. FASTER. AFFORDABLE UTI DETECTION
