

Your specialty is our specialty at CompuGroup Medical. Experience a OBGYN-designed EHR and integrated PM that can help improve your clinical outcomes, boost revenue, and save your providers time.

Enhance care with smarter, integrated workflows for OBGYN, family planning, and reproductive health.

As an OBGYN practice you need...

- Robust content for gynecology and obstetrics care such as prenatal flowsheets and antepartum forms
- Key pregnancy-related patient indicators such as LMP, EDD, GTPAL, and risk factors that are always visible
- Support for pregnancy planned payments
- OBGYN specific billing and ICD coding

Clinical decision support

- Our EHR makes helps support high-performing practices. Care gap reminders, protocol-based templates, patient engagement tools, and more make it easy to address patient screenings, follow best practices, and support your quality initiatives and optimize patient care.

Easier ePrescribing

Want a less cumbersome way to manage medications? You've got it.

- Award-winning tools make it easy to write new scripts, refill, change, and more
- Advanced capabilities include real-time benefit checking and electronic prior authorization. You can instantly view co-pay and costs for medications and determine if a generic or equivalent medication exists, and if necessary trigger a time-saving electronic workflow to request authorization for expensive meds
- A patient app supports adherence, encourages compliance, and reduces patient call-backs

Flexibility to document your way

- Document according to your style! Enter data via voice recognition, dictation/transcription, touch screen, point and click, keyboard, or handwriting recognition

Increased patient satisfaction with engagement tools

- Integrating with your appointments and demographics, **CGM APRIMA** can deliver appointment reminders and mass messaging, so you stay connected with your patients
- Drive down no-show rates with visible patient reminders
- Powerful patient portal supports clinical information sharing including results, educational material, refill requests, and messaging resulting in higher overall patient satisfaction
