OBGYN

EHR and Practice Management

Your specialty is our specialty. Experience an OBGYN-designed EHR and integrated PM system that can help improve your clinical outcomes, boost revenue, and save your providers some valuable time.

Enhance care with smarter, integrated workflows for OBGYN, family planning, and reproductive health.

As an OBGYN practice you need...

- Robust content for gynecology and obstetrics care such as prenatal flowsheets and antepartum forms
- Key pregnancy-related patient indicators such as LMP, EDD, GTPAL, and risk factors that are always visible
- Support for pregnancy billing and planned payments
- OBGYN specific billing and ICD coding

Clinical decision support

 Our EHR helps support high-performing practices. Care gap reminders, protocol-based templates, patient engagement tools, and more make it easy to address patient screenings, follow best practices, and support your quality initiatives. Optimize patient care and focus on what matters most—your patients.

EHR and Practice Management

Easier ePrescribing

Want a less cumbersome way to manage medications? You've got it.

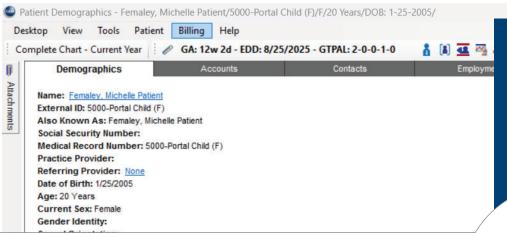

- Award-winning tools make it easy to write new scripts, refill, change, and more
- Advanced capabilities include real-time benefit checking and electronic prior authorization. Instantly view co-pay and costs for medications and determine if a generic or equivalent medication exists. Save time and improve the patient's time to therapy with electronic authorizations for prescriptions
- A patient app supports adherence, encourages compliance, and reduces patient callbacks

Flexibility to document your way

Document according to your style! Improve the patient experience using ambient Al
with coding suggestions, voice recognition, templates, and more to streamline and
support your preferred documentation methods

Increased patient satisfaction with engagement tools

- Integrating with your appointments and demographics, CGM APRIMA can deliver appointment reminders and mass messaging, so you stay connected with your patients
- Send preventative care reminders and other messages to improve quality and drive down no-show rates
- Powerful patient portal supports a nearly touchless patient intake process including payment collection, screenings, and clinical forms. Promote higher patient satisfaction and practice efficiency through online results, education, refills, appointment requests, and more.
