Code G2211 it was made for ALL of us!

CMS created this code to better account for the resource costs associated with the complexity of our visits. It is an opportunity to receive extra revenue without the need for any extra work - either with extra charting nor additional time. It can be created for us with in CGM APRIMA as a separate part of the HPI, and all it takes is 2-3 clicks to successfully bill it. It gives us an additional 0.33 wRVUs to our E/M codes and in the NYC area pays $18.56.

Office of the CMO | Best Practices

When we see a patient that is our responsibility to care for over many visits, CMS has released G2211 to be added to EVERY visit that has a 99201-99215 E/M code, which is not modified by a 25 as when a wellness exam is performed or a vaccination is given. The rules are easy to follow, and absolutely a positive force to add to our visits, both primary care and specialists who see the same patients over and over again should add this code to their encounter.

CGM APRIMA allows you to create a Chief Complaint which should be named G2211. Add a symptom named G2211 then a category also named G2211 and then an element "add a G2211 to today's visit". This is then modified to add the procedure G2211 so it appears in the super bill automatically. Once this appears in your must frequently used list the process is only 2 clicks. These two clicks gets you .33 wRVUs and an average of $16-$18 additional revenue dollars added to your E/M code.
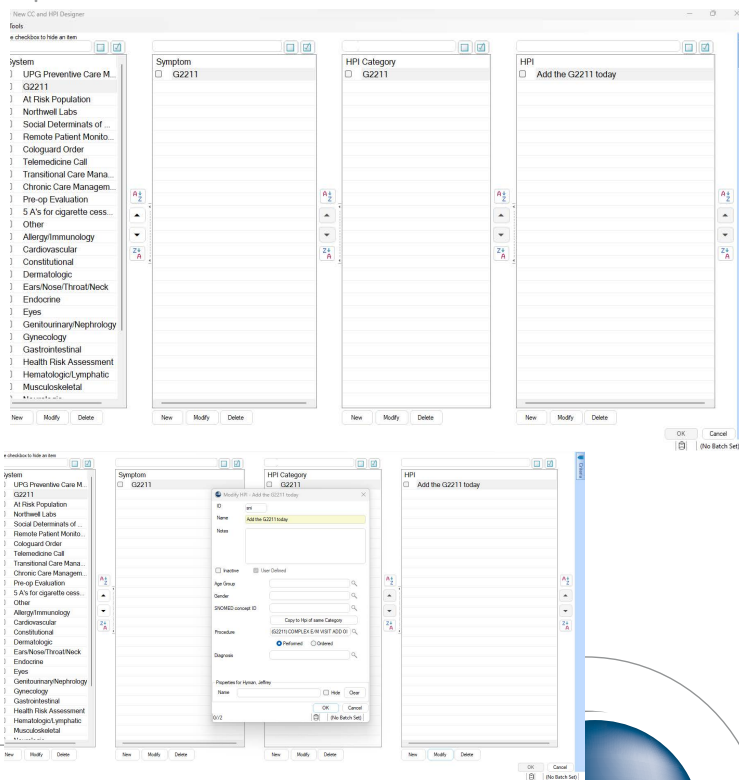

About the Author

Dr. Jeffrey Hyman is one of three Chief Medical Officers at CompuGroup Medical.

Dr. Hyman completed his internship and residency at the Maimonides Medical Center in Brooklyn, New York, in 1984. He started one of the first walk-in, no-appointment-needed primary care offices in the area and focuses on primary care and preventive health. His practice now is centered on quality preventative medical care.
