

Simple. Certified. Secure.

Telehealth. It's no longer simply a nice-to-have option for patients — for many, it's a must-have. A survey by Sage Growth Partner (SGP) and Black Book Market Research found that 59% of consumers reported that they are now more likely than ever to use telehealth services, and 33% reported that they would consider leaving their current physician for a provider that offers them a telehealth solution.

At CGM, we understand the trends and have evaluated the long term needs of our providers: we don't want your practice to get left behind. **CGM ELVI** offers you the ability to connect with your patients like never before from anywhere, anytime.

Improve Patient Engagement

Telehealth allows patients and providers to instantly connect, which not only improves patient engagement, but elevates the quality of care provided. **CGM ELVI** saves patients time and allows patients who are immobile or require chronic care to avoid unnecessary journeys. Patient outcomes are also improved since providers are able to initiate therapies more rapidly.

Flexibility for You and Your Patients

CGM ELVI is a web-based solution that works with Windows and Apple operating systems. You and your patients can use it virtually anywhere, any time, from any device. Telemedicine adds flexibility to your scheduleby giving you the option to offer extended hours or weekend operations.

Boost Practice Efficiency

In addition to the benefits of telemedicine for healthcare providers and their patients, there are advantages for office staff as well. Video visits make everyone more efficient by removing the administrative overhead of in-person visits. **CGM ELVI** offers additional role options for administrative ease, the ability for the front desk to conduct a pre-visit check-in with patients, a Control Center and Patient Queue in an easy-to-use Waiting room, and the ability for providers to switch effortlessly between various physician Waiting Rooms.

Secure and HIPAA Compliant

Your patients' privacy is important. Not only is **CGM ELVI** flexible, but it is secure and HIPAA compliant. You can feel confident that when you share images, findings, vitals, and image captures with your patients that their data is safe and confidential.

Fewer No-Shows and Last Minute Cancellations

No-shows and last minute cancellations are big profit drains and time wasters for medical practices. This frustration can be mitigated with the help of telemedicine by eliminating many of the factors that cause them. Not only do virtual visits allow patients to avoid costs associated with travel, but by choosing telemedicine they can avoid crowded waiting rooms and possible exposure to illness.

Increase Revenue

Video visits are more efficient than in-person ones. This means that you can see more patients during the same period of time. When you offer **CGM ELVI** telemedicine visits to patients with insurers that will reimburse for telemedicine, your practice can enjoy revenue growth without the need to add providers, office staff, or office space.

The Future is Now
