Improved patient search

By popular demand, the patient search function has been expanded to allow users to search by a patient's insurance ID. CGM LYTEC 2026 is smart enough to find a given patient even if the ID entered is actually the patient's secondary or tertiary insurance.

Improved AR tracker

CGM LYTEC 2026 includes improvements to the AR tracker. Users can choose from saved AR filters, and now they can choose whether or not to automatically start with the filters they used during their previous session.

Easier online patient payments

With CGM LYTEC 2026, you can add a QR code to patient statements, making payments easier than ever. When patients scan the QR code, they're instantly taken to a secure, mobile-friendly online payment page—no manual entry required.

This convenient feature, available in conjunction with our eMEDIX clearinghouse, streamlines the payment process, reduces barriers for patients, and helps your practice get paid faster.
