

Integrated eCQM reporting

CGM MEASURES for CGM eMDs is an integrated application that lets you dynamically monitor your scoring for the CMS Merit-Based Incentive Payment System (MIPS).

Our proven electronic clinical quality measures (eCQM) reporting tool makes it easier to manage quality and report performance.

Key Benefits

- An integrated solution means no more need for third-party eCQM workarounds
- Easy navigation: select and view measures by provider and drill down to measures, patients, exclusions, etc.
- Support for dozens of the most commonly used quality measures with more being introduced regularly
- Daily updates make it easy to verify customizations in the EHR as well as daily patient encounter data entry
- Flexibility: generate QRDA1 or QRDA3 files on demand for ACO reporting, and upload to whichever registry you use
