Relied upon software

CCM MEASURES 2023.1 is a 2015 Cures Edition HIT module that records data entered in CGM EHRs for Quality Reporting. CGM MEASURES does not store the full patient record and does not store any additional Electronic Health Information (EHI) that is not already recorded and stored in the EHR. To comply with §170.3155(b)(10) Electronic Health Information export, CGM MEASURES relies upon CGM EHR for EHI Export.

Additional documentation for Electronic Health Information Export can be found in the guides provided for each EHR:
