CHOOSE A
CONFIGURATION

With software options for different kinds of testing and interfaces for up to eight instruments, we have developed a few useful configurations to meet your specific requirements.

Automate the process of managing patient test orders and posting accurate results to a patient's EHR chart. Save time, eliminate paper, reduce manual or scanned transcription errors, and meet reimbursement goals. Use the Robust - Tox configuration for qualitative and confirmatory toxicology documentation.

Not sure which configuration is best? Our Area Sales Managers will evaluate your lab and testing menu and help you choose the option that's best for you.

Feature	Point of Care	Robust - One	Robust - Three	Robust - Tox
Workstation, monitor, keyboard, barcode label printer	✔	✔	✔	✔
Uni- or bi-directional instrument interface	1-8 (POC)	1-8	3-8	3-8
Uni- or bi-directional EHR interface[1]	1	1	1	1
Barcode label printing	✔	✔	✔	✔
Manual test entry, electronic transfer of results	✔	✔	✔	✔
Quality control module	✔	✔	✔	✔
Patient reporting w/ abnormal and critical result flagging	✔	✔	✔	✔
Onsite installation and training	✔	✔	✔	✔
Remote user access	✔	✔	✔	✔
Toxicology module		optional	optional	✔
PCR module		optional	optional	optional
Calculation for free testosterone		optional	optional	optional

1. Subject to EHR vendor fees. Consolidate vendors with CompuGroup Medical to save on software interfaces.
