FLEXIBLE PATIENT PAYMENTS

CGM webPRACTICE

Practice Management

CGM PAY is a payment processing solution that gives you the flexibility to customize payment options for your patients' convenience. Best of all, the PCI-compliant integration with your **CGM webPRACTICE** workflow saves your staff time and reduces keying errors.

CGM PAY follows the playbook practices demand—tightly integrated solutions that extend the capabilities of your practice management system.

Key Features

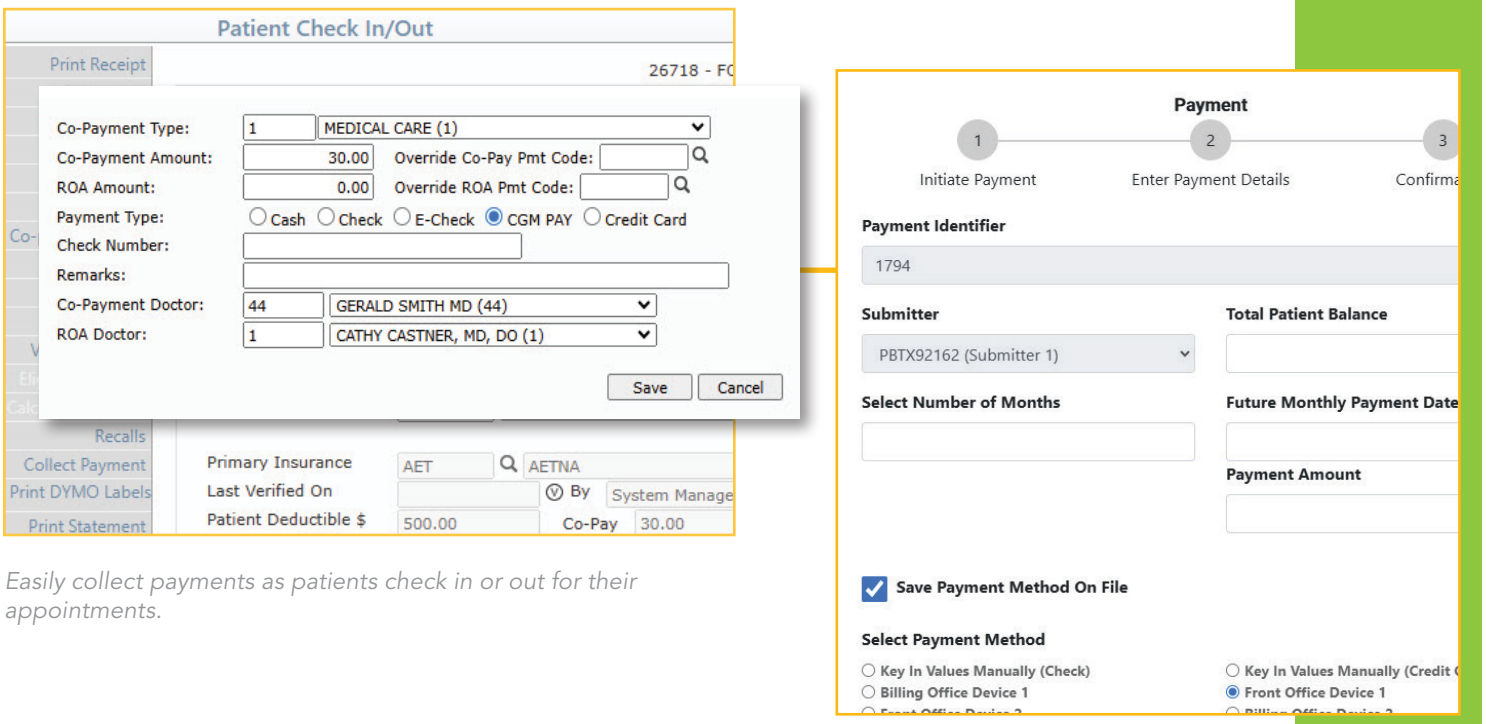
- PCI-compliant, saved payment information means future payments are quicker and more convenient for patients and staff
- Payment plans with customizable setup for each patient
- Support for practices with multiple merchant IDs
- Refund and void processing from within **CGM webPRACTICE**
- Integration with statements makes it easier for patients to pay and you to post. A unique ID and QR code links to an online payment portal from which payments can automatically post to balances
- Integration with the **eMEDIX** Payment Portal allows patients to easily make payments online

CGM webPRACTICE

Practice Management

Simple integration

CGM PAY delivers a simple integration using workflows any **CGM webPRACTICE** user already knows.



Easily collect payments as patients check in or out for their appointments.

Manage Payment Plans

EASTSIDE MEDICA
