

Modern, secure cloud hosting for CGM SCHUYLAB

Cloud hosting delivers a modern, secure, and fully managed LIS environment—without the cost and complexity of maintaining your own servers. By hosting **CGM SCHUYLAB** on CGM-managed infrastructure, your lab can reduce IT overhead, improve reliability, and stay focused on patient care instead of hardware and system maintenance.

With cloud hosting by CompuGroup Medical, CGM manages the hosting environment, operating system, database, backups, and core availability, while your team maintains full control over workflows, users, and day-to-day operations.

Enjoy predictable, subscription-based pricing, improved security and compliance, automatic software updates, and a scalable platform that grows as your lab grows.

Key Benefits

- Reduce on-premise IT and hardware costs
- Strengthen security and support compliance
- Improve reliability with professionally managed infrastructure
- Access **CGM SCHUYLAB** securely from multiple locations
- Receive faster updates, patches, and enhancements

Why labs choose cloud hosting for CGM SCHUYLAB

Laboratories choose cloud hosting by CompuGroup Medical to simplify their IT landscape while maintaining the full power of **CGM SCHUYLAB**. Hosting eliminates the need to purchase, manage, and refresh server hardware, and reduces reliance on internal IT resources for database maintenance, backups, and disaster recovery planning.

Our cloud hosting environment is designed for compliance with supported operating systems, secure access controls, encrypted data transmission, routine patching, monitoring, and documented recovery processes. Your lab benefits from enterprise-grade security and reliability, backed by our expertise in healthcare technology.

What CGM manages

Our cloud hosting model lets your team stay in control of how the lab operates while CompuGroup Medical takes responsibility for the underlying environment. CGM manages:

- Server infrastructure and operating systems
- Database administration
- Security patching and system monitoring
- Backups and disaster recovery processes
- Environment availability and performance

Migration made simple

CGM provides a structured migration path to hosting that includes planning, data migration, validation, and go-live support. Migration is scheduled to minimize downtime and disruption, with clear communication at every step. Your lab gains a modern, hosted platform with a predictable transition process.

Is cloud hosting right for your lab?

Cloud hosting for **CGM SCHUYLAB** is ideal for:

- Labs running on aging or difficult-to-maintain infrastructure
- Organizations with limited internal IT resources
- Growing labs that need a scalable platform
- Labs seeking improved security, reliability, and business continuity
