Practice Management

"I've had opportunities to view demos of other practice management solutions since I joined [Cardiovascular Consultants] in 2001 and have found no other solution that comes close."

LINDA ELLIS

DIRECTOR OF BILLING
CARDIOVASCULAR
CONSULTANTS, LTD

CGM webPRACTICE is a cloud-based, SaaS (software as a service) practice management solution designed to enhance efficiency and support the growth of your practice or laboratory.

Key Features

- Interface implementation fee waived when connecting to any LIS or EHR in the CompuGroup Medical portfolio
- Built-in scheduling module for physician office labs or clinics
- Comprehensive, pre-designed report library
- Collections tools for successful claims management and billing
- Real-time snapshots of your key performance indicators
- User-enabled customizations for efficient workflow management
- Client invoices for third-party, referring provider relationships

CGM webPRACTICE

Practice Management

Streamlined billing and profitability

Save time and money while you concentrate on your core mission: delivering high quality healthcare.

Customized processes and results

An approachable, SaaS solution, **CGM webPRACTICE** is easy to set up and customize to enhance and streamline your workflows.

Boost efficiency by customizing and automating your routine processes. Optional webTOOLS offer claim scrubbing, real-time insurance eligibility verification, and more. Work smarter, not harder.

Secure data and interoperability

Enjoy a seamless integration with software by CompuGroup Medical including our laboratory information systems, practice management software, or electronic health records.

"CGM webPRACTICE has enabled Arizona Orthopedic Associates to increase operational efficiency. As a result, our practice has only two billers on staff even with considerable growth in our operations over the years. We are able to realize annual cost savings associated with staffing to the tune of about $75,000."

BOB CORDOVA

PRACTICE ADMINISTRATOR
ARIZONA ORTHOPEDIC ASSOCIATES

"We recently broke our record by achieving 19 days in accounts receivable for our claims. About 10 years ago, our AR days were far above 60. With CGM webPRACTICE, we succeeded in progressively surpassing the industry average of about 30 days in AR. The insurance collections module has made a huge difference to us. We are able to set follow-up dates for Medicare and our other insurance plans. If any claim remains unpaid longer than it should, we can flag it for immediate follow-up to ensure timely reimbursement."

TERI PALUSO

PRACTICE ADMINISTRATOR
INTERVENTIONAL PAIN CONSULTANTS, PA
