

RHC/FQHC Quality Improvement Program

ChartSpan makes improving quality easy by leveraging a chronic care management (CCM) program to improve quality measure scores. ChartSpan Clinicians speak to noncompliant patients each month and take actions to drive their quality improvement.

ChartSpan helps improve quality scores through a variety of measures.

Quality Measures:

Breast Cancer Screening

Colorectal Cancer Screening

Diabetes:
Hemoglobin
A1C Poor Control

Pneumonia
Vaccination

Controlling
High Blood
Pressure

Influenza
Immunization

Advance
Care Plan

Depression
Screening

BMI Screening
and Follow UP

ChartSpan utilizes your existing EHR and reporting modules to improve quality scores.
